

CARRIER/SERVICE PROVIDER PERSPECTIVE

BLUEKEY DASHBOARD

BlueKey App

- Building staff will receive access request notification (request can be approved from BlueKey dashboard)
- Building staff will be able to grant access, set access times and permissions as well as select which doors the carrier/service provider will have access to
- Building staff will be able to audit who has been granted or denied access and see a history for each carrier/service provider registered

Physical Key

(Up to the building to decide if they would like to roll out the use of keys)

- Building staff can request that carriers and service providers receive an RFID card for Bluekey or;
- Carriers/service providers can request for a RFID card from the building staff
- For each RFID card, building staff will be able to program the card and set access times and permissions
- The card will then be provided to the carrier/service provider

***Disclaimer:** Building staff will have the ability to adjust access times and permissions, set expiry and request renewal access from the BlueKey dashboard
